AMENDMENT

Hon. Commissioner for Patents
Box Non-Fee Amendment
Washington, D.C. 20231

Sir:

The Office Action mailed January 29, 2002 has been carefully reviewed and the following amendment has been made in consequence thereof.

Reconsideration of the restriction requirement imposed under 35 U.S.C. § 121 is respectfully requested.

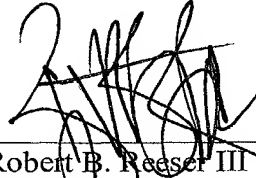

A restriction to either invention I, consisting of claims 1-10 drawn to the method of positioning a sensor, classified in Class 29/598, invention II, consisting of claims 11-18, drawn to a stator assembly, classified in class 310, subclass 254, or invention III, consisting of claims 19-24, drawn to a rotor position sensor, classified in class 310, subclass 68 was imposed. In response, Applicants confirm the election with traverse to prosecute the invention of Group I, claims 1-10.

The requirement for election is traversed because the inventions set out by the claims in Groups I, II, and III are clearly related. Applicants submit that a thorough search and examination of any Group would be relevant to the examination of the other Groups and would not be a serious burden on the Examiner. Additionally, requirements for election are

not mandatory under 35 U.S.C. 121. Accordingly, reconsideration of the election requirement is requested.

Respectfully Submitted,

A handwritten signature in black ink, appearing to read 'Robert B. Reeser III', written over a horizontal line.
